MY SWISS BRICK TRIP · SCHAFFHAUSEN

# Munot

Photo: Beat Ruest · CC BY 4.0

**601 pieces · 94 different parts**

A brick-built souvenir model, compatible with standard bricks.

On its display stand: 25.7 × 27.2 cm, 19.2 cm tall.

Parts lists for Pick a Brick and BrickLink: see the project website.

Relive your Swiss holiday, brick by brick · a free hobby project, not affiliated with any brick manufacturer

# Munot

The Munot is the huge round fortress on the hill above Schaffhausen, with a tower on its rim and a vineyard below. It was built between 1564 and 1589 and fought only one battle. Today it is a park, a party venue and home to a keeper who still rings a bell by hand every night.

*On the Emmersberg hill at the east end of Schaffhausen's old town, above the Rhine.*

| | |
|---|---|
| **Built** | 1564 to 1589 |
| **Type** | round artillery fortress with a tower, inspired by Albrecht Dürer's ideas |
| **Material** | pale local limestone |
| **Size** | about 50 m across; walls 4 m thick; about 25 m up to the top platform, the tower about 15 m higher |
| **Bell** | the Munotglöggli, cast in 1589, 420 kg |
| **Visitors can** | walk up for free, climb the tower, see the vaulted hall inside and visit the deer in the moat |

*The brick-built model you are about to build.*

# Through the centuries

**1098** A first fortification called Annot or Unot stands on the hill.

**1564 to 1589** The city builds the round fortress, partly with compulsory labour. It costs as much as about 800 town houses.

**1589** The Munot bell is cast in Kempten and hung in the tower.

**about 1660** The moat is widened to about 20 m and 8 m deep. It never holds water.

**1799** On 13 April the French garrison fires on the Austrians, the only battle the Munot ever sees.

**after 1804** The empty fortress decays and its stones are taken for new houses.

**1839** After years of work led by drawing teacher Johann Jakob Beck, the restored Munot is reopened with a big feast on 30 October.

**1905** Fallow deer move into the moat. A small herd still lives there.

*Photo: KAI LARS SCHERER · CC BY 3.0 · Wikimedia Commons*

## A stag called Mr Mayor

Look down into the moat on the north side. The fallow deer have lived there since 1905, and the stag always has the same name as the city's current mayor.

## Nine o'clock, every night

At nine every evening the Munot keeper, who lives in the tower, rings the little bell by hand for five minutes. It once told people that the city gates and inns were closing. In 2019 it stayed silent for the first time, on the day of the women's strike.

## Up the ramp

Inside, the Reitschnecke, a cobbled spiral that horses once used too, winds up to the platform. On top you stand on the vaulted roof of a huge hall held up by nine pillars, with a view over the old town and the Rhine. On summer Saturdays, people dance the quadrille up here at the Munot balls.

### FIND IT IN SCHAFFHAUSEN

**Address**
Munot, 8200 Schaffhausen

**Getting there**
From Schaffhausen station it is about 15 minutes on foot through the old town, then up the Munotstieg steps through the vineyard. Bus 4 stops near the top at Künzleheim.

**Tip**
Entry is free; the fortress is open longer in summer than in winter, so check the times. Stay in the old town until nine in the evening to hear the bell.

# Colours in this set

Sort your bricks into these colour groups before you start, one bowl each. Light and dark versions of a colour look alike under warm light: sort them in daylight. Every step names the colour of each part, plain name first, official name in brackets.

| colour | | in greyscale | pieces | bowl |
|---|---|---|---|---|
|  | **White** |  | 213 | 5, 7 |
|  | **Green** |  | 118 | 1 |
|  | **Light grey** (Light Bluish Grey) |  | 104 | 6 |

|  | **Sand Green** |  | 1 | 9 |

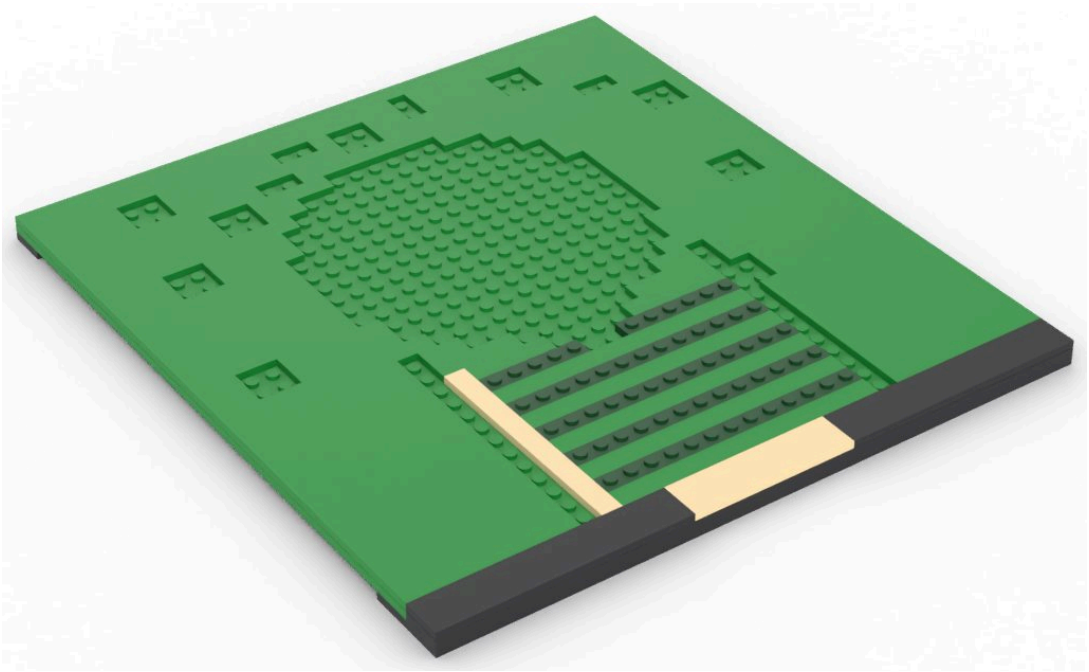
## Chapter 1

# The vineyard

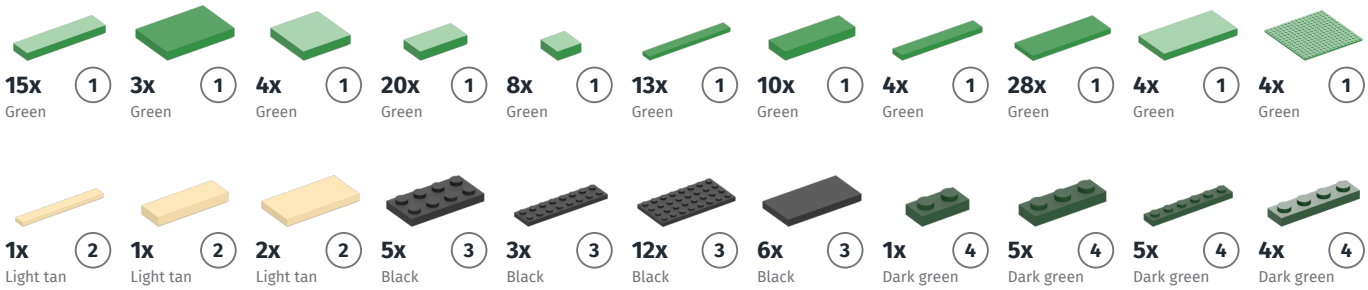
Steps 1–29 · 158 pieces

### You'll need bowls 1, 2, 3 and 4

Every model in the series stands on the same black display stand with a nameplate, so your souvenirs line up on the shelf. You build the base first; while it is still flat, you press the stand's plates under its front edge and the feet under its back. The label goes on at the very end.

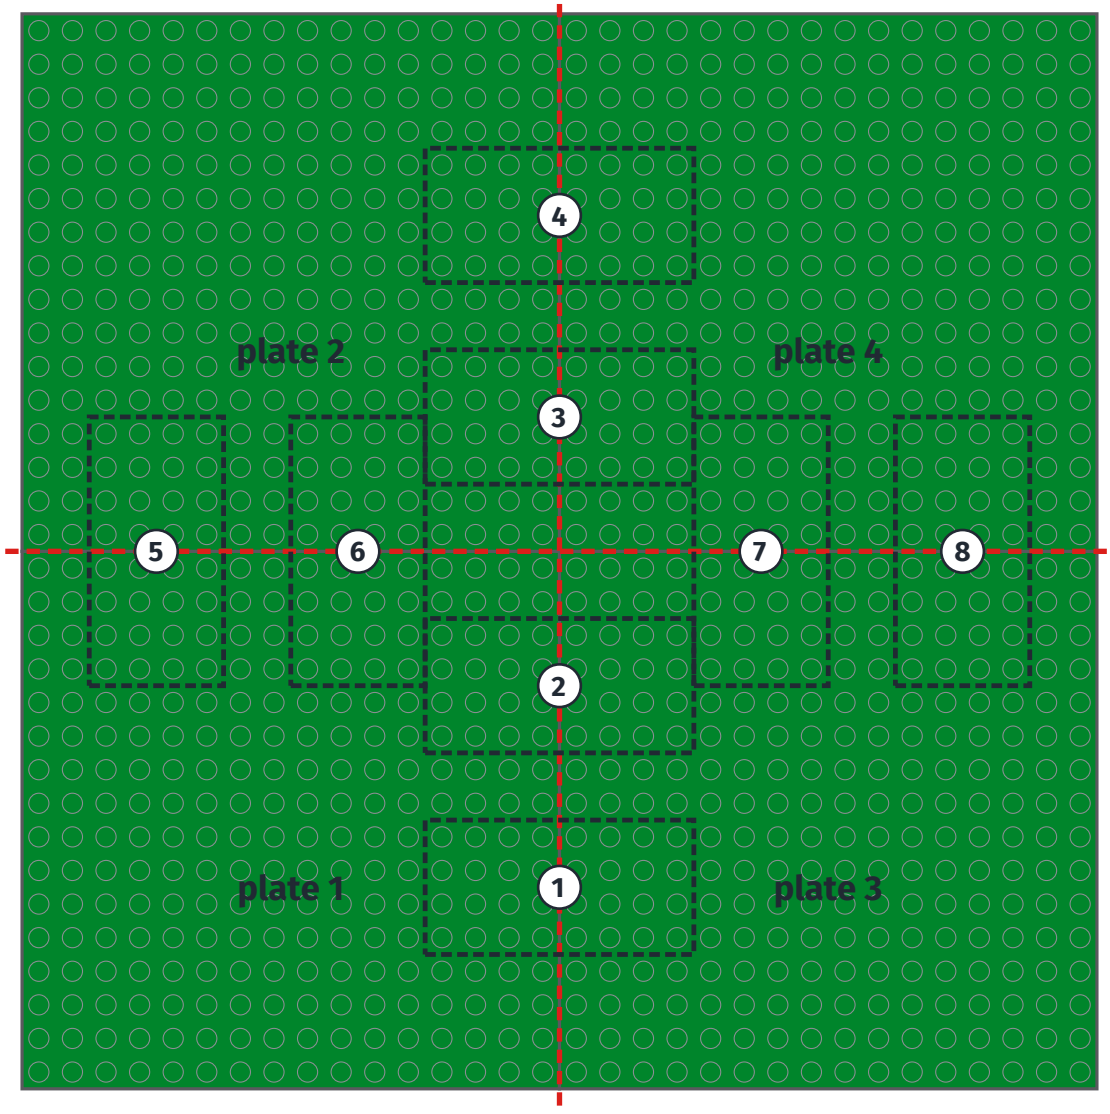


**Parts in this chapter (the circle: its bowl)**



# First: join the base plates

The base is 4 plates of 16 × 16 studs (Green), 32 × 32 studs in all. In steps 1–2, lay the 8 black plates on the table, studs up, where the dashed outlines are. In step 3, press the base plates on top, edges flush: each plate below sits half under one base plate and half under the next, so the seam is locked along its length.

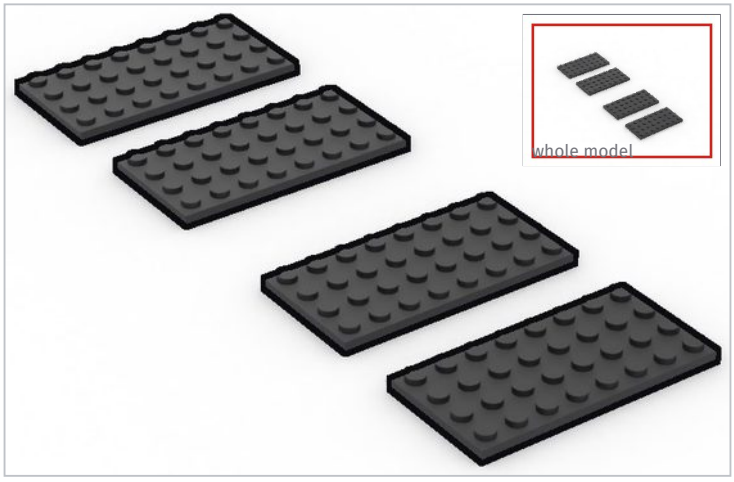


**FRONT: this edge faces you in the step pictures. Red dashes: the seams.**

1 8 × 4 plate, Black, underneath: 12 studs from the left edge, 4 from the front
2 8 × 4 plate, Black, underneath: 12 studs from the left edge, 10 from the front
3 8 × 4 plate, Black, underneath: 12 studs from the left edge, 18 from the front
4 8 × 4 plate, Black, underneath: 12 studs from the left edge, 24 from the front
5 4 × 8 plate, Black, underneath: 2 studs from the left edge, 12 from the front
6 4 × 8 plate, Black, underneath: 8 studs from the left edge, 12 from the front
7 4 × 8 plate, Black, underneath: 20 studs from the left edge, 12 from the front
8 4 × 8 plate, Black, underneath: 26 studs from the left edge, 12 from the front

**1**

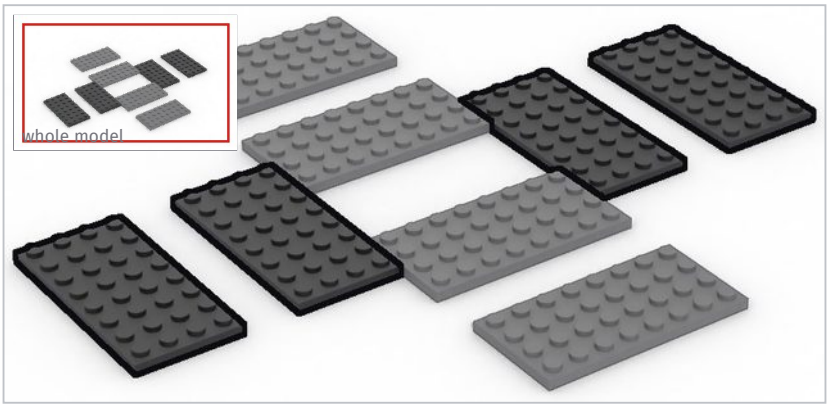
**4x**
**Black**



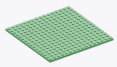
**HIDDEN SUPPORT**
These black plates go under the seams and lock the four base plates together. On the display stand they sit flush, out of sight.

**2**

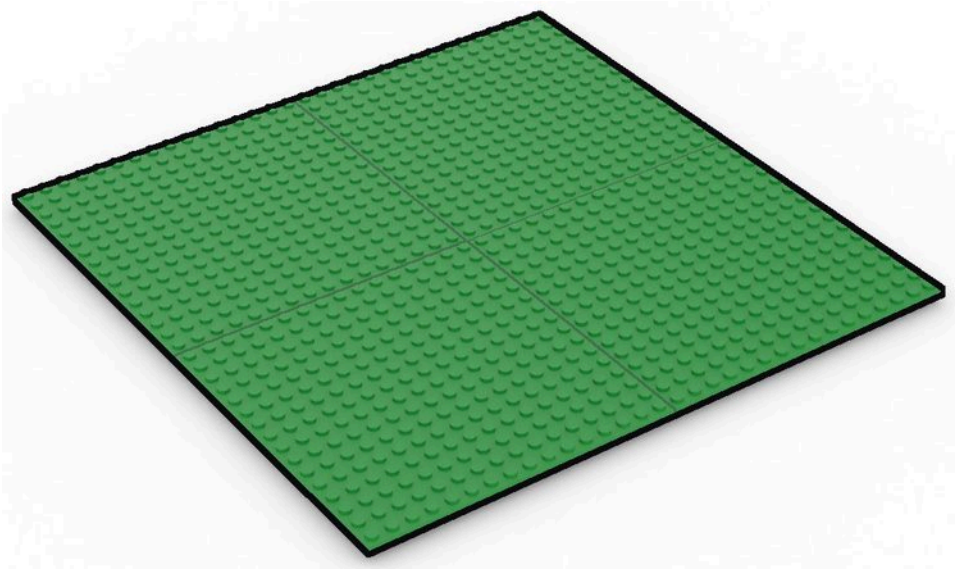
**4x**
**Black**



# 3

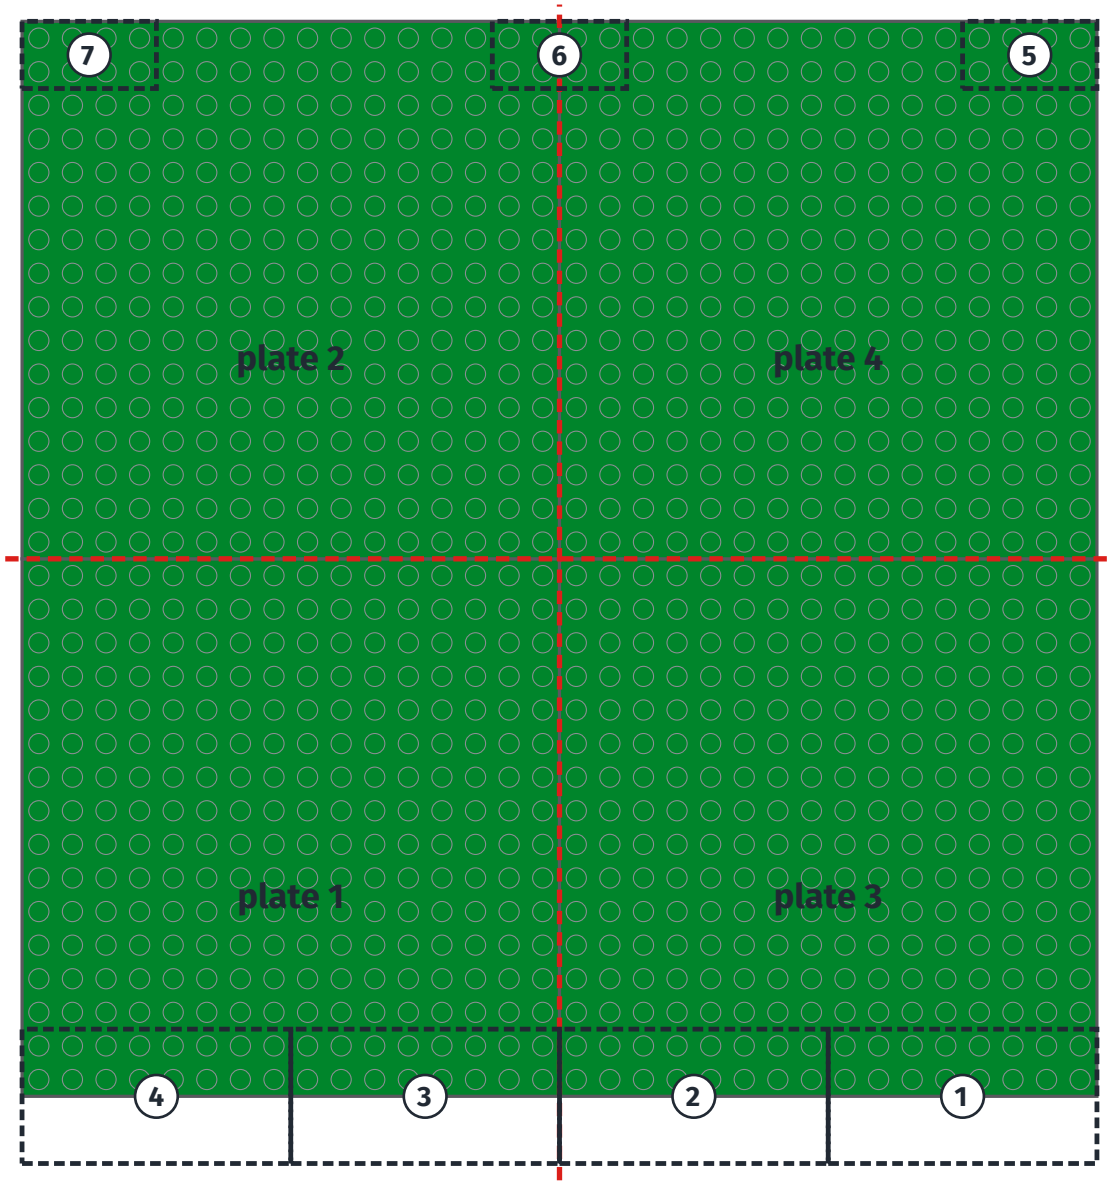


**4x**
**Green**



# Then: the display stand goes under the base

In steps 4–5, while the base is still flat and light, lift its front edge and press the 4 long black plates under it: half under the base, half sticking out in front, where the dashed outlines are. Then lift the back edge and press the 3 small black plates (the feet) under it. The model now stands level on its display stand; the strip and the nameplate go on top of the long plates next.



**FRONT: this edge faces you in the step pictures. Red dashes: the seams.**

1 8 × 4 plate, Black, underneath: 24 studs from the left edge, 0 from the front
2 8 × 4 plate, Black, underneath: 16 studs from the left edge, 0 from the front
3 8 × 4 plate, Black, underneath: 8 studs from the left edge, 0 from the front
4 8 × 4 plate, Black, underneath: 0 studs from the left edge, 0 from the front
5 4 × 2 plate, Black, underneath: 28 studs from the left edge, 32 from the front
6 4 × 2 plate, Black, underneath: 14 studs from the left edge, 32 from the front
7 4 × 2 plate, Black, underneath: 0 studs from the left edge, 32 from the front

# A stag called Mr Mayor

Look into the moat behind the fortress: a little deer is grazing there.

Fallow deer have lived in the Munot moat since 1905. The stag always carries the name of Schaffhausen's current city president.

Up in the tower lantern hangs the Munot bell of 1589. The keeper rings it by hand every evening at nine, once the signal to close the city gates and the inns.
